ADULT ORAL SEDATION DENTISTRY

3-day course | 25 credit hours

Banish patient fear forever

An astonishing 75% of the population suffers from dental anxiety. Learning sedation dentistry gives you the skills to better the lives of patients with dental phobias. Our Oral Sedation Dentistry course, taught by Anthony S. Feck, DMD and Leslie Fang, MD, PhD, offers everything you need to integrate sedation into your practice. You will study two levels of sedation, nine proven protocols, systems management for your team, and the science behind sedation. You'll also engage in airway management training designed to build your confidence, and view videos of sedation patient experiences demonstrating step-by-step protocols, monitoring, patient assessment, and drug interactions.

- ✓ Learn seven factors you must know to confidently deliver oral sedation dentistry
- ✓ Understand ten crucial skills for communicating with a sedated patient
- ✓ Identify five keys to airway management using hands-on training
- ✓ Discover how to create advanced treatment plans for neglected mouths

RECERTIFICATION ORAL SEDATION DENTISTRY

1-day course | 7.5 credit hours

Dentistry, medicine, science, and pharmacology are continually evolving

As a sedation dentist, your skills require constant renewal to ensure you're providing patients with the best care possible. Maintaining and growing the skills you learned in Oral Sedation Dentistry is simple with our one-day refresher course. We recommend attending this course - taught by Anthony S. Feck, DMD, and Leslie Fang, MD, PhD - at least once every two years.

- ✓ Learn about the latest developments in oral sedation protocols and pharmacology
- ✓ Review airway management and patient assessment techniques that will help keep your patients safe
- ✓ Examine pharmacokinetics and pharmacodynamics to help you choose the best drug(s) and protocols for each patient
- ✓ Understand methods to increase or decrease sedation levels

ADVANCED SEDATION MASTER SERIES

2-day course | 15 credit hours

Expand your patient base and broaden your knowledge

Individuals suffering from chronic medical problems are one of the fastest-growing segments of the patient population. These patients benefit from sedation dentistry, as it is the safest and least stressful way to receive care. Participate in Advanced Sedation, presented by world-renowned presenters Anthony S. Feck and Leslie Fang, and learn to safely manage sedation appointments of ASA III patients with asthma, diabetes, bleeding disorders, and other medical issues in this two-day intensive didactic case-based experience!

Learn Critical Facts on Next-Generation Medications:

- ✓ New anticoagulants beyond Warfarin
- ✓ New antiplatelets beyond Plavix
- ✓ New bisphosphonate/osteonecrosis of the jaw guidelines
- ✓ New metformin guidelines for type 2 diabetes

With Advanced Sedation, you can safely and confidently care for these patients in your practice.

March 3-4

Doctor.....\$2,297
DOCS Member.....\$2,083

Prerequisite: Oral Sedation Dentistry

This course is designed for doctors who have completed a minimum of 50 sedation cases and are interested in reaching a larger patient base.

ACLS RECERTIFICATION

1-day course | 7.5 credit hours

Specially designed for dental offices

This one-day, hands-on course will update you on the latest advances in emergency preparedness. You and your team will leave with the skills and confidence required to respond to the most common dental emergencies, including respiratory failure, airway obstruction, cardiac problems, and anaphylaxis. Meets your ACLS recertification requirements.

ACLS CERTIFICATION

Online + 1-day course | 15 credit hours

Practice above and beyond the standard of care

Add ACLS certification to your armamentarium during your weekend at New York University and leave confident and prepared to handle the most common real-life emergencies that a dental office may encounter. This course combines the required AHA online module with the intensive live experience of our hands-on module from professional advanced emergency experts.
